

Immunology 101 & Interpreting Laboratory Results

***Presented by the Indiana State Department of Health
Epidemiology Resource Center (ERC)***

This course is targeted to laboratory personnel and nurses dealing with immunology. By the conclusion of the course, participants will have a fundamental knowledge of immunity and how the immune system processes can serve as markers to diagnose disease. Additionally, the training will cover the differences between different types of laboratory testing procedures and how to interpret results produced by these procedures. The importance of laboratory result information in disease investigation and case classification will also be discussed.

Pam Pontones, ISDH Epidemiologist, will conduct the training **on Friday, June 7, 2002 via satellite downlink from 1:00-3:00**. All presentation materials will be available on the ISDH web site at <http://www.statehealth.IN.gov/bioterrorism> two weeks prior to the session. Registrants will be notified via e-mail of their nearest downlink site prior to the broadcast.

Registration

Those interested must register no later than Friday May 17, 2002. To register, e-mail your form to Pam Pontones at ppontones@isdh.state.in.us or fax your form to 317-233-7805. Alternatively, you may mail your form to ISDH, attn: Pam Pontones, 2 North Meridian Street 6-A, Indianapolis, IN 46204. Copies of the form can be made as necessary. Registrants will receive an e-mail confirmation. **There is no registration fee for the course.**
